Description

The Major League Baseball along with the MLB network and MLB advanced media are part of a variety of sustainability efforts that include initiatives such as “Green Team” activations during MLB All-Star Week, front office volunteer efforts and those operated by MLB clubs. In particular, the emphasis is, among others, on waste management through the collection of recyclables.

Environmental benefits

The efforts made by clubs regarding recycling materials allows to reduce the impact of waste on the environment.

Economic benefits

The waste management practice allows the league and consequently teams to reduce the costs related to the waste collection and disposal.

Applicability and replicability potential

The practice can potentially be applied in other contexts. However, it is important to consider that MLB is a particular type of league. Then, the replicability should meet the specific characteristics of each league (consensus between the clubs of the sport national league)
